

16 JUL 1981

MEMORANDUM FOR THE RECORD

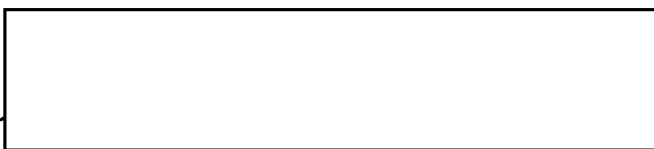

SUBJECT: Aerial Photographs of Agency Compound

1. An integral part of the Master Plan Update by Skidmore, Owings & Merrill (SOM) is an Aerial Photography Survey. This survey will be accomplished by Cervantes & Associates, a subcontractor of SOM.

2. Mr. Allen Carrol of SOM called on 16 July and related that Cervantes would like to conduct the survey on the weekend of 18/19 July. The exercise is actually done in two parts, the first being the laying out of panels for measuring purposes, which will be done on 17 July. The second part is the actual flyover and will be on Saturday or Sunday between the hours of 1100 and 1300. The weather will dictate either the Saturday or Sunday flight. The aircraft will make two passes--one at 3,000 feet and one at 9,000 feet.

3. The entire exercise has been coordinated with the Office of Logistics and the Office of Security. Escorts have been arranged for, and the particulars of type of aircraft and markings have been passed on to the proper authorities.
